

Engineering Manager

Ansen Corporation is a growing electronics contract manufacturer in Ogdensburg, NY. We are seeking a seasoned engineer who possesses the experience, knowledge and leadership ability to direct our engineering staff and the polish, communication and presentation skills to be a key player providing the technical element to support our sales effort as required.

The Engineering Manager supervises our methods/process engineers and all technical support and documentation control activities. Also responsible for planning, directing the activities of the Technical Support Groups (Process Eng., Doc Control, Facilities and Quotation/ labor groups) to obtain the most effective and economic operation for current and future products. This role involves occasional travel for prospect and customer meetings, and preparation of/participation in technical presentations to support the sales effort.

BS in Manufacturing Engineering or other related field, strong electro-mechanical background and 5-7 years of supervisory/mgt experience is required. A thorough working knowledge of plant engineering, industrial engineering and tooling as well as the ability to efficiently integrate existing methods with new innovations to economically solve production problems in a timely manner is required. Proficiency with PC based software applications (ex: ProDesign, AutoCad, SolidWorks and MS Office Suite) also necessary. Successful applicant must demonstrate a high level of professionalism, exceptional communication and presentation skills.

We offer a competitive salary and a comprehensive benefit package including medical, dental, prescription, life, long term disability and 401K to the right candidate. To apply, please email resume, salary requirements, letter of interest and three references to the Director of Human Resources, at ansenhr@ansencorp.com.
